PRINTING DIRECT TO SUBSTRATE

Our flatbed UV printer allows us to print direct to flat surfaces up to 40mm thick, meaning we could take a door and print direct onto it! Most commonly we print direct to foamex, perspex and other specialist material. This printing process reduces costs as it allows shorter production times than normal large format printing. The maximum sheet size we can print to is 3050mm x 1600mm. Your prints can also be cut-to-shape on our router.

Our most popular materials are:

- 1/3/5/10/19mm thick **foamex** for POS graphics, short term signage and exhibition use
- 4/5/8/10/18mm thick **correx** - a fluted lightweight material used for short term displays
- 3mm thick **aluminium composite 'Dibond'** available in white & metallic shades for signage
- 220/440mm white **semi-rigid PVC** on rolls for POS use
- **Card & fluted card** for POS displays, FSDU's and boxes
- **Acrylics** - clear & opal for specialist use in 3/5/10mm thicknesses
- **Canvas, fabrics** & numerous other specialist materials for custom graphics

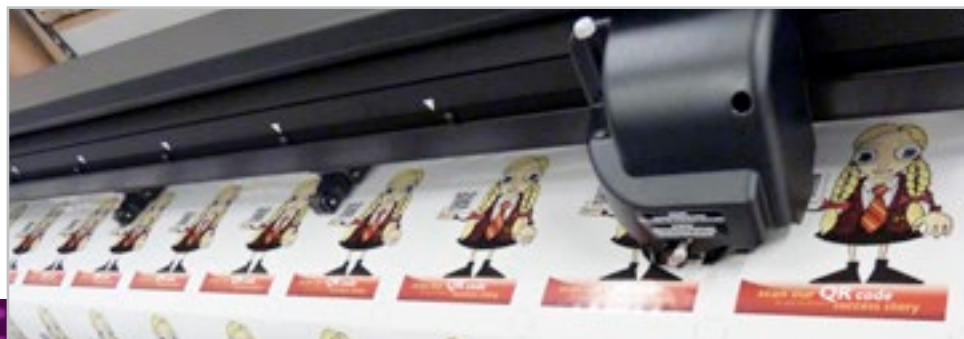

ROLL TO ROLL PRINTING

Our range of the latest HP latex ink, high-resolution printers allow us to utilise all continuous roll to roll materials available today. Many can be overlaminated for additional outdoor protection or combined with other media for special effects. Most materials can be cut-to-shape on our router or vinyl cutters.

Our most popular materials are:

- Photo satin **220gsm paper** for posters and general displays
- Satin **220mic Opaljet** for roller banner displays
- Textured **500mic Opaljet** for all large exhibition stands
- White **self adhesive vinyl** for POS & signage
- **Clear self-adhesive** for all window graphics
- **Micro dot self adhesive** in either white or clear for easy fit
- **Textured canvas** for framed displays
- **550mic PVC** banner material
- **Blockout 500mic PVC** banner material for specialised use
- **Black backed Artex** for large exhibition set panels
- A wide range of other specialist materials for custom POS & displays

FOAMEX DISPLAYS

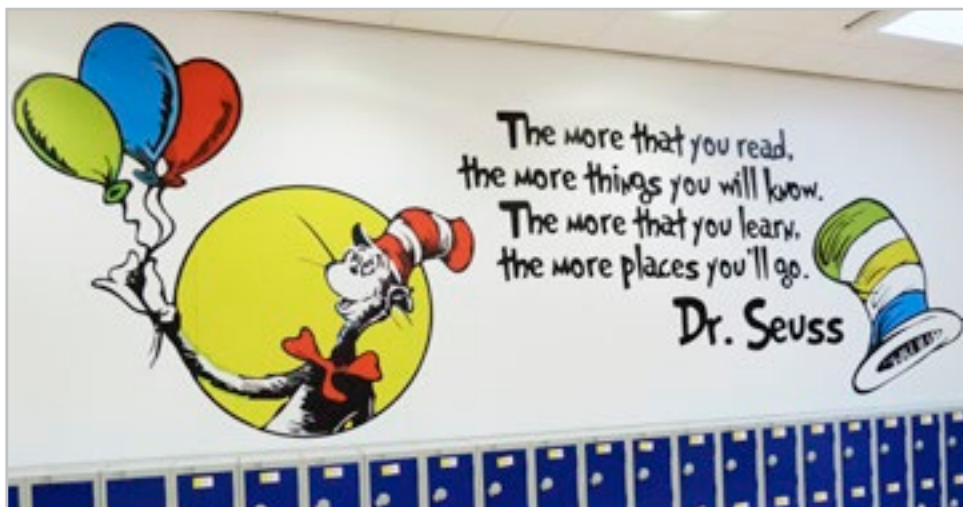

Foamex, a rigid plastic based material is a very popular choice for use within the exhibition industry, point of sale displays and short term signage. When it's printed on directly from our flatbed printer the surface exhibits a wonderful satin finish. Thickness of foamex range from 3mm and 5mm for exhibition and POS displays through to 10mm and 19mm for various projects.

With the material's strength and the UV ink properties, foamex is ideal for production of hard-wearing wall displays that may be susceptible to ongoing wear and tear.

As the UV curing ink is both waterproof and lightfast it is also popular for short term outdoor signage.

GOOD TO KNOW...

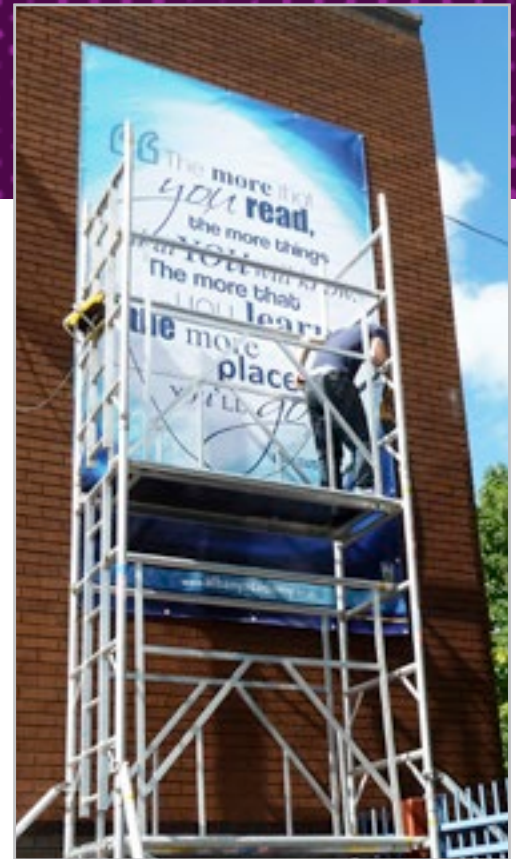

PVC BANNERS & FRAMES

We print a wide range of PVC based banner materials, designed for outdoor promotions, exhibition wall coverings, back lit lightboxes and framed signage. With up to 5m width in one piece and larger sections sonic welded together, we can create anything from full building wraps to small one off promotional signs.

Some of our standard materials are:

- 500mic front lit PVC for standard display banners
- 550mic block out PVC for light sensitive large displays
- 450mic backlit PVC for lightboxes
- 350mic black backed canvas Artex for exhibition wall coverings
- 500mic black backed PVC for café barrier displays

in addition

we have a range of freestanding A frames designed to display your banners along with a wall mounted frame system, allowing you to change promotional messages. These can be constructed to any size and backlit by LED illumination, creating large lightboxes for maximum impact.

WALL & GLASS GRAPHICS

VINYL WALL, GLASS & PROMOTIONAL STICKERS

Print and cut-to-shape self adhesive vinyl stickers can be used for a wide number of applications. They are all printed with outdoor grade, lightfast inks onto a range of materials depending upon application. Many printed vinyls can be over laminated for additional outdoor protection in either gloss or textured laminate for specialised use.

Materials include:

- White self adhesive
for application to walls, signs, packaging etc.
- Clear self adhesive backed up in white
for all glass & window applications
- Micro dot adhesive white and clear
for easy customer applications

FLAT COLOUR, FROSTED & OTHER SPECIALIST VINYLs

Some projects only require a pre-coloured vinyl, frosted glass effect or other specialist vinyls. We have 1000s of these for glass frosting, tinting or printing onto for custom designs. All can be cut to shape to incorporate logos or for window manifestations.

Call 01772 733213 for details

PRINTED WALLPAPER

Digitally printed wallpaper is a fantastic way of transforming your office or retail interiors. We offer a range of textured and specialised surfaces which are flame retardant, paper or fabric based and include gold or silver metallic surfaces for special effects.

We can print wallpaper up to 1370mm wide by any height.

NEW PRODUCT MAGNETIC WALLS

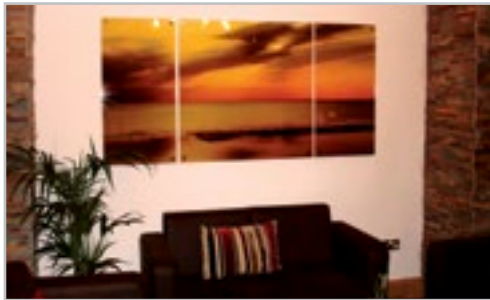

Magnetic walls are a new way to create easy-to-change graphic walls for point of sale or other promotions.

We can also supply magnets or can print thin magnetic panels to stick to the wall

**Very versatile and quick to use.
Transform your walls today!**

ACRYLIC DISPLAYS & SIGNS

We utilise a range of Perspex and other acrylics to produce stunning displays and create special effects for use in commercial, office and domestic purposes. These can be printed onto the reverse of clear 10mm or 20mm thick material for acrylic art displays or onto the reverse of 5mm for more commercial types of signage.

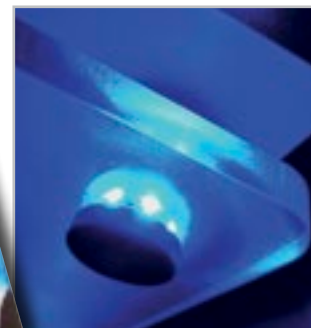

- Acrylics can be routed to shape with polished edges and supplied with polished chrome, brass or black wall stand offs for decorative mounting.
- Specialist sparkly vinyl can also be printed onto, for application to the reverse of clear acrylic, to create stunning glittery effects.

options

- ✓ Acrylic designs can be cut to shape on our router.
- ✓ We can provide a variety of stand-offs to provide a professional finish.

CUSTOM POS DISPLAYS

We can combine printing onto a range of materials including metal, plastics and card with cutting and folding to create bespoke point of sale displays. These can be for a multitude of purposes ... **only limited by imagination!**

hundreds of
variations

- ✓ We love working on your bespoke products

GOOD TO KNOW...

- From plastic boxes for shipment, acrylic product displays, sample viewers, TV viewers and literature stands, the range is endless.
- Freestanding product cut outs are also a popular use in these POS displays.

A BOARDS

We supply a range of heavy duty A boards that can be customised to your requirements with printed graphic panels and logos. All are double-sided with some available powder coated in 17 different colours.

The most popular A boards include:

■ BOOSTER A BOARD

Available in a range of colours and sizes, the Booster features a semi-circular top panel that can be branded with your logo on both sides. The standard graphic retention below is a printed poster behind a magnetic clear panel. This can be upgraded to a printed foamex panel for locations where the A board can be subject to passing vandalism and removal of standard panels.

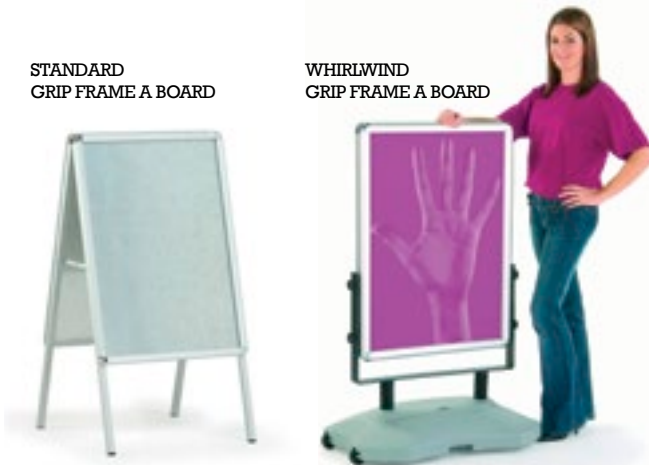

Available in A2 / A1 / A0 and 40 x 30" sizes.

BOOSTER A BOARD

STANDARD
GRIP FRAME A BOARD

WHIRLWIND
GRIP FRAME A BOARD

■ STANDARD GRIP FRAME A BOARDS

Available in a range of sizes and colours where the poster is held under a clear plastic sheet by a grip frame. Lightweight and cost effective.

Available in A1 / A2 / 20 x 30" sizes.

■ WHIRLWIND GRIP FRAME A BOARD

A heavy duty A board incorporating a grip frame graphic holder on springs with a water filled base for additional stability.

Available in A2 / A1 / A0 sizes.

PRINTED FLOOR MATS

We can brand your floor with our range of printed floor mats, whether it's for an exhibition, reception area or retail space.

- The **ULTIMATE** mat features individually printed woollen tufts, bonded together onto a rubber backing to form logos and images. These can be power washed and are ideal for use in heavy reception and office traffic areas.
- **1.5mm NTRIDE** rubber backed mat - not as hard wearing as the Ultimate where the image is printed onto a white cotton surface and heat bonded onto the rubber backing. Ideal for medium weight traffic.
- **G FLOOR MAT** for exhibition use where areas of the floor can be branded as required. G Floor is an extruded clear patterned vinyl where the image is printed onto the reverse and backed in white with a non-slip backing applied. As the image is hidden by a 2mm thick plastic surface it can never be damaged and the mats can be re-used.

LIGHTBOXES

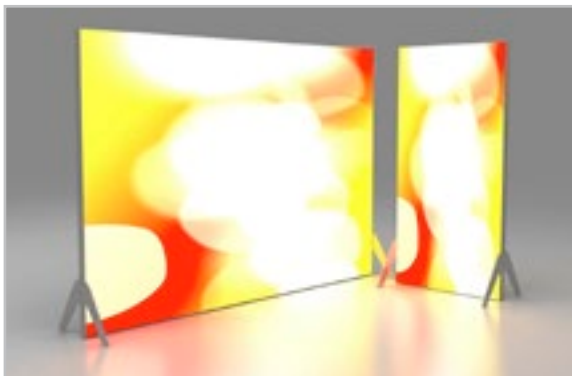

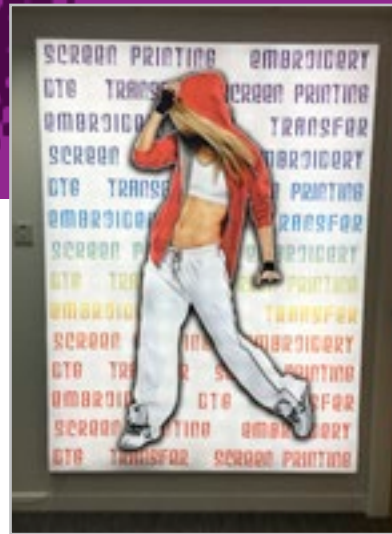

Lightboxes brighten up your walls or rooms. We print and manufacture a range of wall mounted and freestanding lightboxes for internal and external use. These are internally illuminated by low voltage LED modules providing low power consumption combined with long term maintenance-free use.

Graphics are either printed fabric with sewn on silicon edging for interior lightbox use, or backlit PVC graphics attached to the frame for outdoor applications.

Frames and boxes can be powder coated to any RAL colour.

- Freestanding interior units come in standard sizes of 1000 / 2000 / 3000mm wide x 2m tall and can be single or double-sided.
- Wall mounted interior units can be any size up to 3m in any one direction.
- Exterior units can be any size up to 5m in any one direction.

VEHICLE GRAPHICS

We can design, print, cut and fit a wide selection of single and full colour vehicle graphics ranging from small vans and vehicles, through to double-decker buses.

■ For **simple designs** we contour cut from a range of self-coloured vinyls or specialist finishes like chrome or kevlar and fit.

■ For all **full colour designs**, we print self adhesive vinyls utilising long life anti-fade inks and cut to shape. These vinyls can be monometric vinyl for flat surfaces or onto cast conformable vinyl for curved and intricate shapes. Both types will be laminated for additional protection with solvent based gloss film.

✓ We can also print designs onto 800 micron magnetic vinyl sheeting for removable applications.

STATIONARY SCHOOL
LIBRARY BUS

CAFÉ BARRIERS

Our café barrier systems allow restaurants, shops and cafés to extend and define their outdoor seating areas with branded graphics, increasing venue appeal and overall income.

- Our systems offer flexibility and ease-of-use with items being interchangeable and versatile.
- With a choice of chrome or black finish posts and three cross bar widths, you can mix and match to fit your venue perfectly.
- Chrome posts and bases are 17kg each with top and bottom cross bars while black ones are 12.5kg with top cross bar and lower bungee banner ties. Wall bracket fixings are also available. All items comply with DDA recommendations.

- ✓ Banners can be printed single or double-sided onto a heavy duty solid PVC or single sided onto a mesh material.

GOOD TO KNOW...

CANVAS ART

Canvas art is great for turning bland walls to life. We produce a range of canvas art designed for your boardroom, reception area, offices or just for you!

- Printed to the highest photographic resolution possible, onto a heavy textured canvas material with lightfast inks, our canvas prints certainly bring walls and images to life.
- We wrap the image around a kiln dried, European pine exhibition stretcher frame, that incorporates a lip on the edge, preventing the wood showing through the canvas. These frames are 36mm deep and 70mm wide and have mitre cut expansion corners so your images will never warp over time.

great
impact!

- ✓ With the image wrapped around the edge, our frames create an impact on your walls!

PROMOTIONAL FEATHER FLAGS

Printed feather flags are ideal for outdoor promotional use, display advertising, sporting events, country shows and trade fairs. We print onto a hard wearing beach flag fabric material, that provides show through onto the reverse of the material.

- They are easily setup in minutes and combined with the correct base, can be used on hard or soft ground.
- Our range of 4 sizes from small to x-large runs from 2.8m to 5.6m in pole height.
- Bases include a ground spike, car foot, heavy water base and even a concrete base for long term use.

ask for our
specialist
leaflet...

PROMOTIONAL TABLECLOTHS

We can brand your tables with printed tablecloths to any size and shape. These are printed in full colour so any design is possible and all tablecloths are fully washable to keep clean.

- Tablecloth coverage can drape over 4 sides to the floor (all over) or down the front, top and part of the back (front/top) configurations. Costs are determined by these options and overall quantity.

✓ Our printed tablecloths are machine washable!

**GOOD TO
KNOW...**

TOTEM SIGNS

Totem signs are an increasingly popular option compared to a traditional panel and pole type. Totems, as the name implies, are vertical structures where the front and optional rear graphic tray folds around the posts effectively hiding them inside the structure.

- Trays are manufactured with an outdoor grade aluminium composite Dibond for long term use. These can have a full colour printed & laminated design, a self coloured Dibond tray with flat cut or raised lettering or a combination of all options.

- The trays are manufactured so they wrap around the sides of the 100mm square aluminium posts, which can also be powder coated to any RAL colour if required.

**with a choice
of double
or single
sided**

option...

- ✓ Changeable acrylic panels can be designed into the structure for additional promotional use.

PANEL & POLE SIGNS

Panel and pole are the more traditional type of sign, where the graphic panel has rails on the reverse so they can be attached to the poles with stainless steel clips. Panels can be any size up to 3m x 1.5m in one piece and can be in either portrait or horizontal formats.

- ✓ Panels can be cut to any shape or incorporate a shaped header

GOOD TO KNOW...

- Panels are manufactured out of 3mm aluminium composite Dibond with full colour printed and laminated graphics or self coloured Dibond with flat cut lettering.
- Poles can be circular or square with dimensions in keeping with the final graphic size. They are white or grey as standard but can be powder coated to any RAL colour.

ILLUMINATED SIGNAGE

The majority of the signage we produce can be illuminated using the following methods:-

■ EXTERNAL SIGN TROUGHS

Here low voltage powdered LED light troughs can be located above the signage to provide downlight illumination at night. The troughs can be of any width by connecting various units together to span the entire signage and they can be powder coated in any RAL colour. Because the units project off the wall and face downwards light distribution is not even.

■ HALO & FRONT LIT ILLUMINATION

Individual built up letters and fret cut signage designs can have LED modules built inside to provide either a front illumination light or rear halo effect. Flat cut individual letters can only have rear halo illumination. Because the LED modules are located inside the signage illumination is even throughout.

...light up
your
ideas

BUILT UP & FLAT CUT LETTERING

PPS design and manufacture a wide range of built up letters and logos and flat cut lettering. All are produced from a range of materials and finishes depending on your requirements.

- Built up letters are chunky 3D types manufactured out of aluminium or acrylic with varying return depths. They can be powder coated to any RAL colour with solid or acrylic faces. Polished stainless steel, creating a chrome effect, is another popular option.
- All built-up letters can be internally lit with LED modules for either front face illumination or rear halo illumination. Flat cut letters can have halo, rear illumination.
- Flat cut letters are manufactured out of 3/5mm thick coloured acrylic, coloured or metallic dibond or foamex materials and are raised off the surface on 15mm spacers.

SHOP SIGNS & HOARDING PANELS

We can create a wide range of options for your new shop sign from temporary use printed onto hard wearing foamex, through to long-term aluminium composite materials for construction site cladding.

These can literally be to any size and shape, combining a range of print and cut processes. Signs can be internally illuminated or with more traditional over head trough downlights.

Some of our more popular options are:

- Full colour composite signs with additional raised lettering & logos
- Tray signs with deep returns
- Fret cut illuminated tray signs

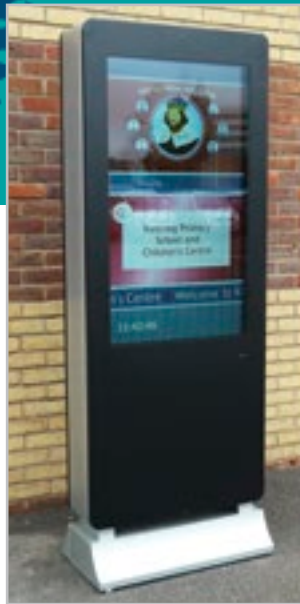

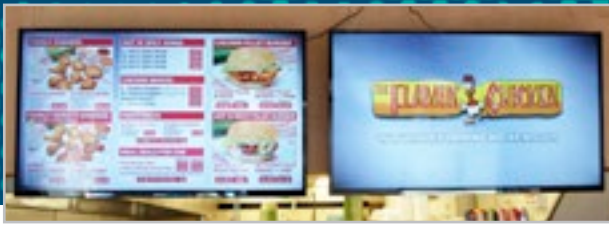

DIGITAL ADVERTISING SIGNAGE

PPS have introduced the latest developments in signage with the launch of our new range of digital advertising screens. These user-friendly displays are a logical progression from our extensive signage range and in addition can be used with many of our exhibition or modular stands.

Call for our dedicated
**DIGITAL
ADVERTISING
DISPLAYS**
brochure for full
information and details.

- Displays are available in a range of sizes and styles with freestanding kiosks and wall mounted units. All feature commercial grade screen panels designed for 24/7 use combined with modern rounded table style aesthetics, buttonless tempered glass and super slim profiles, making them the most striking displays on the market today.
- Units are available for indoor and full outdoor use and available in standard and touchscreen functionality.
- Ease of use is paramount on our screens and come with a simple to use 'plug & play' USB operation or for complete remote control a cloud based server system. Both can display videos, live websites, images, news feeds and many other advertising features including scheduling operations.

ROLLER BANNERS

We have four ranges of roller banner displays where the only difference is the base unit type and cost. In all cases the graphic is printed at high resolution onto a 220mic satin block out Opeljet material up to 1500mm wide. Our 2m & 2.4m wide banner stands come with a 500mic blockout PVC graphic.

■ SLIMLINE - 2 FOLD OUT LEGS

The Slimline is our most cost-effective stand, it has two foldout feet and comes with a padded bag and printed graphic.

All graphics are 2000mm tall
by these available widths:
850 / 1000 / 1200 / 1500 / 2000.

options

- ✓ We also provide A4 & A3 desk top roller banners.
- ✓ Clip on halogen lights are available for all roller banners apart from A4 / A3 units. Roller banner units over 1500 mm widths have two poles so would require two lights.

■ BARRACUDA LARGE BASE

Our Barracuda has a larger footprint base combined with telescopic pole and better quality padded bag.

All graphics are 2130mm tall by these available widths: 800 / 1000 / 1200 / 1500 / 2000 / 2400mm.

■ EXCALIBUR DOUBLE SIDED UNITS

This double-sided unit is similar to the Barracuda but takes a graphic on both sides of the pole.

All graphics are 2130mm tall by the following widths: 800 / 1000 / 1200 / 1500 / 2000 / 2400mm.

■ IMAGINE REPLACEABLE CASSETTE

Our Imagine unit features an easy to change cassette where you can swap graphics into the same base unit for changing promotions. Spare cassettes are available.

All graphics are 2130mm tall by the following widths: 800 / 1000mm.

POP UP PORTABLE EXHIBITION DISPLAYS

We have a range of traditional magnetic pop up exhibition display systems for all exhibition, shell scheme and POS promotions.

- All feature heavy duty 500mic printed graphics and come in a variety of sizes in both curved and straight configurations.
- Pop ups are usually single sided but can be produced double sided at additional costs.
- All stands & graphics come in a large transport case with wooden table top and optional case graphic transforming it into a lectern. Either halogen or LED lights are available as required.
- Small TV units can be attached to the larger stands.
- Replacement graphics can be made for any system - please enquire.

■ CURVED POP UP STANDS

1 x 3 / 2 x 3 / 3 x 3 / 4 x 3 / 5 x 3

All stands are 2225mm tall with the following widths
1240 / 1930 / 2540 / 3070 / 3550mm.

All front & end panels are 673mm wide x 2225mm tall.
Rear panels are 807mm wide x 2225mm tall.

■ STRAIGHT POP UP STANDS

1 x 3 / 2 x 3 / 3 x 3 / 4 x 3 / 5 x 3

All stands are 2225mm tall with the following widths
1240 / 1970 / 2700 / 3435 / 4160mm.

All end panels are 673mm wide x 2225mm tall.
Front & rear panels are 733mm wide x 2225mm tall.

options

- ✓ Printed case wraps are 1770mm wide x 790mm tall and include a 25mm overlap at the rear.
- ✓ Case upgrades available.
- ✓ Various light options available.

FABRIC EXHIBITION & POS STANDS

We have an exciting **NEW** range of printed fabric display stands suitable for a multitude of purposes including exhibitions, POS and retail. These include back walls, counters, freestanding and hanging structures - **please ask for full dedicated brochure.**

All stands are constructed from a collection of lightweight tubes which are pre-numbered for ease of assembly. When erected, the double-sided printed fabric is stretched over the frame like a sock and zipped along the bottom.

As the displays come as double-sided as standard, the graphic can be the same or different on both sides - all for the same cost plus the graphic is also machine washable!

CURVED WALL

- ✓ Extremely easy to assemble
- ✓ Machine washable graphics!

GOOD TO KNOW...

■ STRAIGHT WALLS

- 2.4m wall - 2350mm wide x 2380mm tall
- 3.0m wall - 2950mm wide x 2380mm tall
- 6.0m wall - 5950mm wide x 2380mm tall

■ CURVED WALLS

- 2.4m wall - 2350mm wide x 2340mm tall x 420mm deep
- 3.0m wall - 2950mm wide x 2340mm tall x 538mm deep
- 6.0m wall - 5950mm wide x 2340mm tall x 700mm deep

DRUM

■ DRUM STAND

A 400mm deep semi-circular stand with depth... 2280mm wide x 2500mm tall x 400mm deep

■ SERPENTINE - DOUBLE S WALL

A shallow double curving S design wall 3048mm wide x 2280mm tall x 444mm deep

■ MONOLITH STANDS

Freestanding straight units with metal base in 4 sizes

600mm - 650mm wide x 2300mm tall

900mm - 955mm wide x 2300mm tall

1200mm - 1240mm wide x 2300mm tall

1500mm - 1544mm wide x 2300mm tall

■ SNAKE

Our most popular freestanding unit because of its dramatic shape with coiled like base! 915mm wide x 2280mm tall x 700mm deep

most popular choice!

MONOLITH

MODULAR TWIST EXHIBITION SYSTEM

Twist is a more lightweight modular display that offers incredible flexibility, stability and ease of use. It fulfills a wide range of exhibition solutions allowing the production of long wall runs combined with flexible corners and a range of accessories including counters and TV displays.

- Designed to fit inside a shell scheme or for use in space only stands, Twi:st provides numerous possibilities.
- Available in three standard heights and three panel widths plus the curved Flexistrip, the system comes as standard with over head lights and can incorporate TV units.
- Matching Twi:st counters, literature stands and hard transport cases are also available.

MODULAR T3 EXHIBITIONS

By far the most popular exhibition options are modular systems that can be self built and incorporate a range of features that would previously have been only available in custom build stands. Modular stands can range from small 3 x 2m units through to large 100sq.m. exhibitions and incorporate a range of graphic types depending on requirements.

Our preferred solution with modular is the exciting Tecna T3 display system. Following a client brief we will design a 3D framework of bars to create the display shape required. This can then be covered in a range of graphics from magnetic roll-ups, overall fabrics or solid panels. Smaller systems with magnetic roll up or fabrics can be easily transported and self built. Larger, more complex structures, can be installed by ourselves or self built after initial training.

✓ T3 can include backlit lightbox graphics, large towers, built in literature shelves, private office doors, lecturns and lighting systems - all easily built with no tools - just Twist & Lock.

GOOD TO KNOW...

Every stand is designed to your specifications with technical plans provided

e info@palmerpublicity.co.uk t 01772 733213

CUSTOM EXHIBITIONS

Custom designed and built exhibitions are used for prestigious display markets, where budgets are high and final results are turn key operations. We can deliver these throughout the UK and across Europe.

- Following an extensive brief, we can design and construct a tailored exhibition that you can just walk onto and find everything in place with all services organised, sorted and ready for use. At the end, we dismantle, save pre-itemised parts for possible future use and store.
- Budget from £1500.00 p.s.m. for design, build and install on stands over 40 square metres.

LOCKABLE NOTICE BOARDS

Our standard lockable notice board / display cases are waterproof and vandal resistant for full outdoor use. Available for wall fixing or post mounting for specialised applications.

- They are available in a range of 11 stock colours and 17 additional colour finishes and can be displayed in portrait or landscape orientation and incorporate door stays, 45mm profile frame, 2mm thick polycarbonate window, waterproof seal and two locking keys.
- Display cases can also be supplied with pin board and magnetic back panels.

GOOD TO KNOW...

- ✓ Our heavy duty range has a 55mm frame profile along with a reinforced lock and hinge system with 2mm thick polycarbonate window offering additional protection against vandalism.

GRIP FRAME POSTER HOLDERS

Our grip frame poster holders are brilliantly easy to use - each side of the frame simply snaps open allowing quick and easy poster change

- Manufactured from aluminium and available in a range of optional powder coated colours, the frames are available in standard snap, lockable and secure types. All come with a protective polycarbonate poster cover and suitable for indoor and outdoor use.

GOOD TO KNOW...

✓ Our standard grip frames have a 32mm wide frame and can be used outdoors if a suitable outdoor grade poster is used.

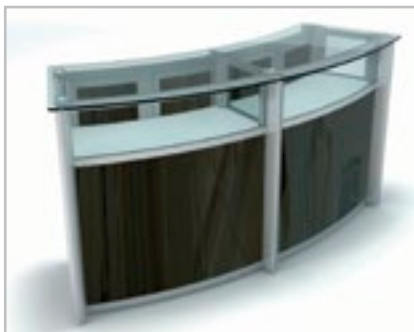

They are available in a range of 17 powder coated colours at extra cost.

Budget priced 25mm frame and 32mm secure frames are also available.

PORTABLE COUNTERS & TABLES

Our range of portable counters and lecterns can be branded with personalised graphics. All our counters are portable, functional and hardwearing so you just have to choose the style that best suits your business.

**FOR BESPOKE
T3 COUNTERS
SEE PAGES 46 to 47**

PRINTED / DUPLICATED DVDs & USB STICKS

With our flatbed printing technology, we can print full colour onto standard 120mm DVDs, duplicate and supply on spindles or with customised packaging if required. Our UV printing produces a vivid print directly onto the face of the DVD and is not a sticker. Our duplication allows for transfer of video, music or data files or can be supplied printed only to allow for customer duplication as required.

GOOD TO KNOW...

- ✓ Our branded USB sticks can also be supplied, printed and duplicated with customer files pre-loaded and with additional space for promotional use.

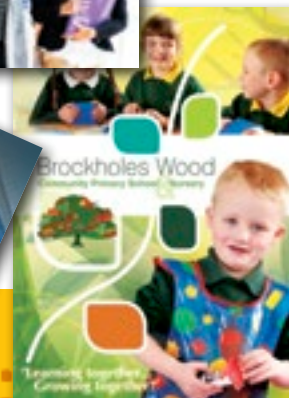

CUSTOM PRINTED PRODUCTS

PPS design and produce a wide range of bespoke litho and digitally printed products that incorporate various specialised finishing techniques.

These range from hard backed cover books, spiral ring bound notebooks and diaries through to desk calendars and stationary.

In addition we photograph, design and print a diverse range of school prospectus material including bespoke brochures, diaries, notebooks, bookmarks, postcards and specialist course materials.

**PPS have

BRAND DESIGN

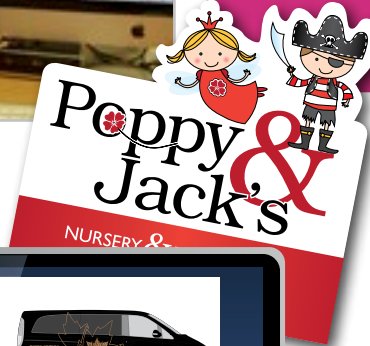

Rebranding projects can involve anything from a simple tweak of an existing logo through to a complete redesign to modernise or rebrand your company.

GRAPHIC DESIGN

Our designers LOVE working on exciting projects... they simply refuse to work on templates which makes our designs unique, tailoring each project to our clients' needs.

PHOTOGRAPHY

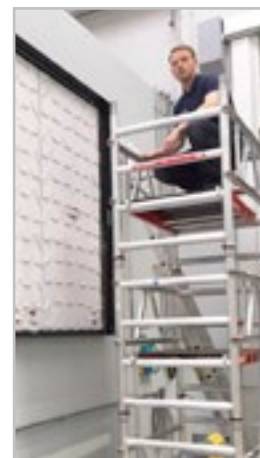

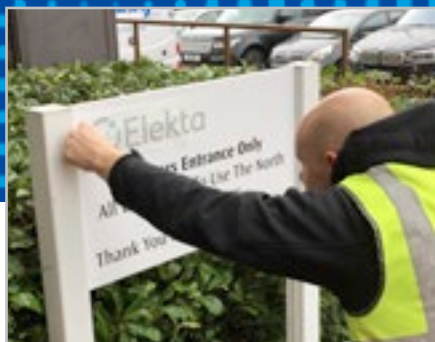

PPS have a history in the photography business, we believe that using great images can enhance our designers' skills... a perfect match!

GRAPHICS, SIGNAGE & EXHIBITION FITTING

In addition to design and manufacture, we also offer a professional installation service. Our fully trained fitters can install everything from window vinyls, vehicle graphics, signage, exhibition stands and have the required certificates to operate high lift vehicles and other specialist equipment required for certain projects.
